MICHIGAN STATE
UNIVERSITY

April 9th, 2021

To Whom It May Concern:

I am writing this recommendation letter in strong support for Suhan Park's application for your Software Engineer Intern position. I am Suhan's academic advisor in the Computer Science and Engineering program at Michigan State University (MSU) and have worked with him during his first year at MSU.

When I first met Suhan, my first impression was that he is a highly motivated student. Adjusting to online classes during a pandemic proved challenging for many students starting college in fall 2020 semester. However, he faced these challenges head-on and excelled in all his classes, making the Dean's List after his first semester.

It is evident to me that Suhan cares greatly about out-of-class learning for himself and others. Despite taking on a heavy course load compared to a typical schedule for a first-year student, Suhan continues to develop his skills as a programmer beyond his courses through self-managed projects. He has also demonstrated his commitment to helping others through private tutoring and utilizing social media to communicate STEM concepts to other students.

Suhan shows great potential in his major and field. I believe that he would be an asset to any work place he is a part of and his hard work will get him very far.

Sincerely,

Evelyn Grace, M.A.
